FROM IDEA TO IMPLEMENTATION

Ferocon is a leading manufacturer of metal products with modern production facilities in Russia and Ukraine with more than 10 000 m², more than 300 employees and its own design office. Ferocon - is a young and ambitious team, reliable and responsible partner, ready to solve any task and achieve results. We encourage innovation and move fast, improving technologies and solutions in line with the objectives of our partners. Thanks to the flexibility of our production we react quickly to the changing needs of the market and growing demands. Continuous modernization of production and improvement of processes has enabled us to double our output in just one year. We have made sure that we are moving in the right direction, focusing on constant development and attention to customers.

Weapons safes

E-137K1.T1.П2.8004

Years of safe warranty

Electronic lock

Mechanical lock (key)

- Welded steel housing
- Internal hinges
- Thickness of metal door – 1.5 - 5mm
- Case metal thickness – 1.2 - 2mm
- Lock type: mechanical or electronic
- Availability of lodgements
- Anchor holes for wall and floor mounting

A weapons safe is the pride of any hunter, symbolizing the dynamism of his life, in which there is a place for his favorite activity. As it was said in the old days - hunting with a gun and a dog is beautiful in itself. Only a true hunter knows the feeling of wandering through the woods on a July summer morning with his gun on his shoulder. Apparently, in every man slumbers that feeling, which everyone calls the hunting passion.

In everyday life, hunting weapons are not safe, so it is necessary to hide them behind the safe door of the gun safe.

Office safes series БЛ (BL)

Years of safe warranty

Electronic lock

Mechanical lock (key)

Color RAL

- Welded steel housing
- Internal hinges
- Door metal thickness – from 1.2mm
- Case metal thickness – from 1.2mm
- Reinforced dummy panel
- Type of lock: mechanical or electronic
- Ability to store all kinds of office documents and folders

The **BL series** safe, in the line of varieties of safes, is something between a metal cabinet and an office safe. This metal product differs from the usual classic safe by its large size, which, at the same time, makes it possible to put inside not only a larger number of items, but also things of different sizes.

It has an excellent aesthetic appearance and a pleasant neutral gray color will fit harmoniously into any office interior.

Customized safes

TM «Ferocon» has everything you need to produce custom-made safes. A fine-tuned production line allows us to meet any request of the customer. Our specialists are ready to help you with the selection and drawing-up of the optimal Technical Requirements.

For you, we can produce safes according to individual specifications which correspond to the following parameters:

- made of metal with thickness of up to 10mm;
- inner lockable boxes with additional shelves or other configurations;
- removable and adjustable shelves;
- electronic or mechanical locks;
- gun trays (lodgements);
- any color for your safe.

We will gladly take on any individual order. We will produce a safe that meets all your requirements and your wishes.

Choice of locks

Mechanical locks provide a high level of security and reliability, protection against drilling and knocking. Electronic locks are protected against code matching. Electronic-mechanical locks differ from electronic ones by the fact that it is needed to turn the handle to open the lock preceded by entering the correct combination of digits.

- Ability to store all types of office documents and folders

What is needed to make your workplace more comfortable? - Comfortable furniture, moreover, functional, so that every document was in its place, and heaps of papers did not grow on the desks.

Office cabinets are one of the tools for creating the image of a successful company, both for employees and for visitors. They also perfectly fit into the interior of the office and are harmoniously combined with other pieces of furniture.

Cell cabinets series НЯ (NYa)

2
Years of cabinet
warranty

- Postal type lock
- Powder-polymer coating
- The number of sections (cells) is from 2 to 12 pcs. (and more)
- Each section is equipped with an individual lock

Nowadays, it is difficult to imagine life without modern supermarkets. Many have already admitted that their selection and quality of products is better and better than, for example, on the market, and the prices are lower. In addition, large supermarkets significantly save our time. Cell cabinets are an integral attribute of modern super and hypermarkets. Capacious, and universal cubicles accommodate customers' belongings convenient and securely store them.

Filing cabinets

Years of cabinet warranty

- The maximum permissible load per drawer is 30kg
- Dimensions of drawers are designed for storing folders
- Equipped with an anti-tip device that prevents more than one drawer from being pushed out at the same time

A filing cabinet is a stylish and practical solution for a modern office. Even the owner of a comfortable and innovative office, equipped with computers, office equipment and electronic media, will not be able to completely get rid of paper documentation. Seals, key partnership and client contracts, tax returns, labor contracts - all these documents require careful storage. Filing cabinets are a practical and environmentally friendly storage solution.

Mobile drawer units

Mobile drawer units are used to optimize the workplace at service stations, repair shops, and compact storage of working tools. Units can be produced in various dimensions and can be equipped with the desired number of drawers. To ensure safety of tools, appliances and small parts, a unit can be equipped with a central lock. Another useful option is the installation of wheels for free movement in the workplace.

It has been proven that workplace optimization allows to increase productivity and significantly reduce the operational time. We will manufacture the necessary equipment based on individual requests to increase the efficiency of your work.

Tool trolleys

Tool trolleys are intended for moving goods, hardware, parts and tools all over the production premises. Professional carts are used by industrial enterprises, manufacturing plants, auto-service centers and workshops. We have a lot of experience and ready-made solutions that can optimize work in the workshop or at production, due to a proper organization of the work environment and convenient provision and handling of the required materials.

Useful tips

... about safes

1. Having received two keys included with the safe, one of them must be securely hidden. Do not make a mistake - do not put the duplicate into the safe!

3. Install the safe in a remote, hidden location where lack of space is an obstacle to the use of large burglary tools.

5. Install the safe according to the building level (the door of the safe should open from left to right, the safe should be built into an opening 2 centimeters deeper than the outer edge of the wall).

... about metal cabinets

7. Metal cabinets should be installed in warm, well-ventilated rooms, with a temperature range of +10...+35°C and a relative humidity of no more than 60%.

... about braziers

9. Before the first use, it is necessary to burn the brazier to remove the preservative grease from its surface.

8825

2. Periodically change the code so that it is impossible to figure it out on a more worn surface of the buttons.

4. For fastening safes, it is recommended to use wedge anchors that can withstand a breaking load from 500kg to 3 tons. The length of the anchors is from 5 to 30cm, the diameter is from 5 to 20mm.

6. To improve the attachment of the safe to the wall, we recommend wrapping it with a welded metal mesh with a cell, placing it at a distance of 30mm from the case on four sides.

8. It should be ensured that the ventilation holes are not blocked. We also do not recommend storing wet items to prevent premature corrosion.

10. Observe fire safety rules while using the brazier.
